## EDUCATION

### Vasireddy Venkatadri Institute of Technology

B.Tech in Artificial Intelligence and Data Science

CGPA: 7.72/10

2022 - 2026

### Jawahar Navodaya Vidyalaya Ongole

Intermediate

Percentage: 74.8 %

2022

### Jawahar Navodaya Vidyalaya Ongole

CBSE

Percentage: 61.4%

2020

## SKILLS

### Languages:

HTML, CSS, JavaScript, Python

### Frameworks:

React, Node.js, Express.js

### Databases Management:

MongoDB, SQL

### Tools:

VS Code, GitHub

## PROJECTS

### CryptosDen

**Technologies used** : MongoDB, Express.js, React, Node.js

- Built a MERN-stack cryptocurrency analytics platform featuring secure authentication, personalized watchlists, and custom price alerts.
- Engineered AI backend services using GRU models for price prediction, anomaly detection, and market sentiment analysis.
- Integrated Socket.io to deliver real-time market data updates, live charting, and an interactive AI chatbot.
- Designed secure RESTful APIs with JWT/Firebase authentication, robust error handling, and rate-limiting middleware.

### Farm-Nimbus

**Technologies used** : Python, FastAPI, React, MongoDB, Twilio API

- Built a full-stack agricultural platform (React, FastAPI, MongoDB) delivering real-time, AI-driven crop recommendations and weather alerts to Indian farmers across 10 crop profiles.
- Implemented automated SMS/voice alert system via Twilio with retry logic and background scheduling to notify farmers of severe weather events.
- Developed a dynamic multilingual translation engine supporting 6 Indian languages with disk-based caching for zero-maintenance localization.

### AI-Powered Health & Wellness Assistant

**Technologies used** : React, Flask, Google Gemini AI, Scikit-learn

- Developed a comprehensive health and wellness platform using a React frontend and a Python/Flask backend to deliver scalable, personalized healthcare solutions.
- Implemented machine learning models (using Scikit-learn) to perform health risk assessments and aid in the early detection of conditions like diabetes and hypertension.
- Leveraged Google's Generative AI to power a 24/7 conversational assistant that provides tailored fitness, nutrition, and empathetic mental health support.
- Designed a user-centric dashboard featuring multi-language capabilities and voice input/output to ensure health tracking is globally accessible.
