EDUCATION

Vasireddy Venkatadri Institute of Technology

B.Tech in Artificial Intelligence and Data Science

CGPA: 7.72/10

2022 - 2026

Jawahar Navodaya Vidyalaya Ongole

Intermediate

Percentage: 74.8 %

2020 - 2022

Jawahar Navodaya Vidyalaya Ongole

CBSE

Percentage: 61.4%

2015 - 2020

SKILLS

Languages:

HTML, CSS, JavaScript, Java

Frameworks:

ReactJS, Node.js, Express.js

Databases Management:

MongoDB, SQL

Tools:

VS Code, GitHub

PROJECTS

AI-Powered Health & Wellness Assistant

Technologies used : React, Flask, Google Gemini AI, Scikit-learn

- Developed a full-stack healthcare platform utilizing React and Flask to deliver real-time health tracking, symptom checking, and personalized wellness guidance.
- Engineered a predictive analytics module using the Extra Trees Classifier (Scikit-learn) to assess user risk for chronic conditions like diabetes with high accuracy.
- Integrated Google Gemini AI to power a multi-lingual, voice-enabled chatbot capable of empathetic mental health support and domain-specific advice (fitness, nutrition).
- Implemented a collaborative filtering system to recommend personalized health plans and visualized patient data trends using Chart.js.

Artifact AI News Feed

Technologies used : JavaScript, HTML5, CSS3, Flask, NewsAPI

- Built an AI-driven health dashboard integrating Google Gemini for conversational medical assistance and Scikit-learn for disease risk prediction.
- Designed a responsive frontend with React and Tailwind CSS, featuring voice recognition, data visualization, and multi-language support (12 languages).
- Deployed a RESTful Flask backend to handle real-time ML inference and secure health data processing.
- Implemented a collaborative filtering system to recommend personalized health plans and visualized patient data trends using Chart.js.
